Integrated Physical Needs Assessment (IPNA)

Building: **Luna Park Housing Corp.**
2879 West 12th Street, Brooklyn, NY 11224

Lawless + Mangione
Architects | Engineers

480 North Broadway, Yonkers, New York 10701
tel: 914.423.8844 fax: 914.423.8981
LawlessMangione.com

OBJECTIVE, PROCEDURES, AND LIMITATIONS

OBJECTIVE

Background:

An **Integrated Physical Needs Assessment (IPNA)** combines the traditional PNA with an energy audit.

A **physical needs assessment (PNA)** identifies building deficiencies and makes recommendations for improvements. These recommendations are accompanied by an implementation timeline and overall cost of each improvement.

An **energy audit** is an assessment of water and energy savings improvements, including their estimated cost, estimated annual energy savings, and estimated annual cost savings.

In addition to combining a traditional PNA with an energy audit, the IPNA also integrates a **Health Overlay** that guides building owners to making changes that will improve the health and safety of tenants. It is possible that additional parts will be added to the IPNA in the future.

Focus:

The end goals of the IPNA are to:

- Identify needed improvements for the building
- Provide expected costs of improvements, along with the cost savings for energy and water improvements, to allow prioritization of improvements for capital planning purposes
- Reduce overall energy and water consumption within the building with suggestions from the results of the energy audit
- Support the search for and acquisition of financing (loans) and funding (grants and tax credits)
- Identify needed improvements to the operations, energy efficiency, and water efficiency of the building, including identifying components nearing the end of their useful life before they fail

PROCEDURES

1. A visual survey was conducted from basement to roof, including, but not limited to, the following: site and public elements; structural frame and building envelope; insulation and roof/wall cavities; mechanical, electrical, and plumbing systems and utilities; life safety/fire protection equipment; and interior elements. This survey included the inspection of 3 units or 10% of the total project's dwelling units, whichever is greater. Units were inspected that contain varying characteristics and conditions, including location (ground floor, top floor, basement, exposed edge and corner units) as well as type, size, and history of rehabilitation.
2. Pertinent documentation was reviewed, including violations issued, Certificate of Occupancy, architectural drawings, maintenance logs, O&M plans, and certifications of training for building maintenance staff.
3. Twenty four months of consecutive energy and water billing statements were reviewed and analyzed to determine the energy and water consumption of the building.

4. Interviews were conducted with the property owner, management, and maintenance staff, and existing O&M logs were reviewed.
5. The energy assessment sought to identify a minimum of 30% energy savings. Energy calculations were interactively calculated, to avoid the double counting of savings.

LIMITATIONS

- Evaluation of building consisted of visual inspection of readily-accessible locations
- No special testing occurred, beyond what can be measured with human faculties, and other than some defined health, water, and energy-related measurements. Examples of measurements taken include boiler efficiency, carbon monoxide levels, and gas leaks; ventilation airflow; relative humidity and indoor temperature; and water flow rates through faucets and showerheads.
- The report represents an extrapolation and is not technically exhaustive, being limited to a specific point in time; also it is not without uncertainty (per ASTM E 2018-15).

EXECUTIVE SUMMARY

Project/Building Name (if any) or Address(es)	Luna Park Housing Corp.
# of Buildings	6
# of Total Units	1585
Report Prepared For	Metro Management Development Inc. / Luna Park Housing Corp. Ernest Susco, RAM, General Manager

Date of Revised Report	

Recommended Energy Efficiency, Water Conservation, Resiliency, and Physical Needs Improvements					
Please note the below recommendations do not take full code compliance into consideration. Please consult with a design profession for implementation.					
Improvement Name	Improvement Description	Improvement Type	Estimated Implementation Cost ($)	Estimated Annual Utility Cost Savings ($/yr)	Potential Health Benefit
Replace Broken/Uplifted Flags	Replace broken and uplifted flags & Curbs	Site Work	$ 800,000		None
Parking Lot Repairs	Long Term	Site Work	$ 5,282,280		None
Roof Replacement	Main Roof	Building Envelope	$ 5,061,100	$ 22,124	None
Replace Hallway Fence with Panels		Building Envelope	$ 6,000,000		None
Basement Columns & Water Prevention			$ 8,000,000		None
LL11 Associated Repairs	Façade Repairs requied by NYC DOB	Building Envelope	$ 10,000,000		None
Elevator Replacement		Building Systems	$ 4,500,000	$ 18,020	None
Water Tank Housing Repairs	Building 3	Building Envelope	$ 180,000		None
Breeching Replacement	Boiler Room	Building Systems	$ 250,000		None
Install TRV Valves	To Control Heating in units	Apartments	$ 2,530,000	$ 11,815	Low
Steam Traps Replacement	Apartments	Apartments	$ 1,012,000	$ 11,815	Low
Steam Traps Replacement	Common Areas	Building Systems	$ 40,000	$ 9,520	Low
Replace hot water heaters	N/A	Building Systems	$ 450,000	$ 20,740	Low
Replace Exhasut Fans	Fans replacement & Clean Ventilation Fans	Building Systems	$ 180,000		High
Upgrade Heating Plant	New Boilers, Burners & Controls	Building Systems	$ 1,500,000	$ 18,135	None
Asbestos & LEAD Testing	Needed for Roof, Windows and Waste Lines	Environmental	$ 85,000		High
Consult with Pest Management	N/A	Healthy/Pest Management	$ 4,000		High
100KW Solar System	1 Per Building	Building Systems	$ 1,357,250	$ 92,736	None
Replace Vacuum Pumps	1 per Buildings	Building Systems	$ 240,000		None
Replace Waste Risers		Building Systems	$ 20,000,000		None
Radiant Radiator Cover	Behind Radiators	Building Systems	$ 2,024,000	$ 9,520	None
Upgrade Boiler Controllers	Indoor Sensors	Building Systems	$ 240,000	$ 19,200	None
Insulate Vacuum & Cond. Tanks		Building Systems	$ 48,000	$ 6,460	None

Recommended Operations and Maintenance Interventions					
General Recommended O&M Interventions	Intervention Type	Why Do It	Frequency	Impact / Cost	Relevant NYC Code and Resources
Inspect fans, fix and clean vents/ventilation ducts, replace filters. Set regular inspection schedule.	Health - Air Quality and Ventilation	Yes	Asthma & respiratory risks	Annual, Filters every 6 mos.	§[C26-1205.1] 27-745 Occupiable rooms. All occupiable rooms shall be ventilated by natural or mechanical means, or by a combination of both. Natural ventilation may be provided except where mechanical ventilation is required by article seven or eight of this subchapter.
Educate tenants about ways to improve ventilation and about reporting fans that don't work and windows that don't open.	Health - Air Quality and Ventilation	Yes	Asthma & respiratory risks	Lease up & annual	
Educate tenants about identifying and reporting problems with central heating/cooling.	Health - Air Quality and Ventilation	Yes	General health; energy efficiency	Lease up & annual	
Ensure regular cleaning of dryers to improve functionality and to reduce fire hazards.	Health - Air Quality and Ventilation	Yes	Respiratory risks & fire hazards	Annual	
Ensure proper venting of dryers.	Health - Air Quality and Ventilation	Yes	Respiratory risks & moisture control	Annual	
Evaluate boiler to ensure proper combustion safety to ensure proper combustion safety and to efficiently manage temperature.	Health - Air Quality and Ventilation	Yes			
Prohibit smoking within units and within 20ft of building. Incorporate no smoking provisions in lease. Note	Health - Air Quality and Ventilation	Yes	Asthma and cancer risks	One time change	https://www1.nyc.gov/site/doh/health/health-topics/smoking-smoke-free-housing.page
Clean mold, eliminate water leaks, clean surfaces and replace surfaces as needed. Fix drainage as needed.	Health - Moisture	Yes	Asthma & respiratory risks; moisture control	As needed	http://www1.nyc.gov/site/doh/health/health-topics/air-quality-indoor-moisture.page
Educate tenants about importance of and ways to report leaks (running toilets, leaking radiators, dripping faucets, moisture problems, and mold issues in the building.	Health - Moisture	Yes	Asthma & respiratory risks; moisture control	Lease up & annual	
Replace or place entry door weather-stripping and door sweeps.	Health - Moisture	Yes	Moisture control; energy efficiency		
Seal holes and cracks, including around plumbing and utility openings and foundation. Install door sweeps to prevent pest entry. Use pest resistant materials during repairs. Accompany pest management professional during each service visit to identify areas in need or repair. Train staff to monitor pest prone places for conditions conducive to pests. Adopt the use of reduced risk pesticides building wide. Review pest proofing tips for building owners, managers and staff in NYC DOHMH IPM Toolkit.	Health - Pests	Yes	Asthma risks, pest control	Rehab, unit turnover, annual inspections	NYC Integrated Pest Management Tool Kit http://www.nyc.gov/html/doh/downloads/pdf/pesticide/ipm-toolkit.pdf
Educate residents on how to minimize food and water sources for pests; identify and report openings for repair; on the use of reduced risk pesticides (gel bait, bait stations). Educate management on implementation of a building-wide Integrated Pest Management (IPM) protocol.	Health - Pests	Yes	Asthma risks, pest control	Lease up & annual	
Adopt an integrated pest management scope of work	Health - Pests	Yes	Asthma risks, pest control	Pest contract	NYCDOHMH Toolkit
Ensure garbage room is properly maintained through maintenance and ensure waste storage capacity meets the needs of the building	Health - Pests	Yes	Asthma risks, pest control	6 months	

Institute an off gassing period for units before occupancy after rehabilitation, especially after carpeting, painting, and floor work	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Post rehab	NYC Local Law 2 (2012) - VOC Emissions Limits in Carpets and Carpet Cushions: https://www1.nyc.gov/site/doh/health/health-topics/air-quality-vocs-and-carpeting-what-consumers-and-the-public-should-know.page and https://www1.nyc.gov/assets/buildings/local_laws/ll2of2012.pdf Floor Refinishing and Moisture-Cure Urethanes: https://www1.nyc.gov/site/doh/health/health-topics/floor-refinishing.page
Ensure carbon monoxide (CO) detectors are installed pursuant to code. Mitigate sources of CO build-up, i.e. back drafting, unventilated heaters, or other combustion effects. Educate tenants to report if their CO detector is going off.	Health - Hazardous Materials and Conditions	Yes	CO poisoning risks	Annual inspection; Lease up	http://www1.nyc.gov/site/hpd/owners/Smoke-carbon-monoxide-detectors.page
Use green products in cleaning, rehab, repairs, painting. Use low-/no-volatile organic compounds (VOCs), low/no formaldehyde in cleaning products, paint, sealants, adhesives, building materials.	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Ongoing	http://programs.lisc.org/NYC/Images/Two_Shades_of_Green_-_Green_Cleaning_Toolkit.pdf; Greenseal; Greenshield; EPA Safer Choice; EPA Formaldehyde emissions standards for composite wood products: https://www.epa.gov/formaldehyde/formaldehyde-emission-standards-composite-wood-products
Seal and clean ventilation ducts, can be HVAC or maintenance staff	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Rehab, energy projects	
Use no-VOC and no-formaldehyde paint, adhesives, sealants, cleaners, and products	Health - Hazardous Materials and Conditions	Yes			EPA Formaldehyde emissions standards for composite wood products: https://www.epa.gov/formaldehyde/formaldehyde-emission-standards-composite-wood-products
Lead: In buildings constructed prior to 1978 (or 1960 in NYC), ensure that lead-safe renovation practices are utilized for any repairs that could disturb lead-based paint. Have building maintenance staff trained and certified in EPA Renovation, Repair and Painting (RRP).	Health - Hazardous Materials and Conditions	Yes	Neurological damage	Rehab, annually for units occupied by young children	In NYC, Local Law 1 of 2004 (the Lead Paint Law) requires owners to annually inspect units occupied by children under the age of six, to identify and fix lead paint hazards.
Ensure indoor and outdoor areas are well lit	Health - Active Design Opportunities to Encourage Physical Activity	Yes	Encourage physical activity	Rehab, ongoing	
Ensure stairs are attractive option over elevators - located close to the entrance and well-lit (with daylight if possible); stair prompt signage	Health - Active Design Opportunities to Encourage Physical Activity	Yes	Encourage physical activity	Ongoing	Stair prompt sign: www1.nyc.gov/assets/doh/downloads/pdf/tcny/takethestairs.pdf or call 311 to order signs in English or Spanish NYC Active Design Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/environmental/active-design-guidelines.pdf Center for Active Design Guidelines: https://centerforactivedesign.org/dl/guidelines.pdf
Install hand held and adjustable shower heads	Health - Fall, Trip, and Fire Hazard	Yes	Reduce trip and fall risks	Annual inspection	
Install slip-resistant adhesive in dark or contrasting color at the edge of each stair	Health - Fall, Trip, and Fire Hazard	Yes	Reduce trip and fall risks	Annual inspection	

Recommended Healthy Rehab Interventions		
	Impact / Potential Cost	Relevant NYC Code and Resources
Vent gas combustion appliances (boilers, hot water heater, stove top)	High Impact, Variable Cost	
Remove carpet; make floors smooth and cleanable	Medium Impact, Variable cost	
Replace gas stoves with electric	Medium Impact, High Cost	
Repair/replace roof top fans, and seal duct work	Medium Impact, Med-Hi Cost	
Install enhanced air filtration in building ventilation/HVAC	High impact, medium cost	
Repair leaks, structural issues, water damage, radiator valves, drainage	High Impact, Variable Cost	NYC Mold Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/epi/epi-mold-guidelines.pdf
Repair/install ventilation/fans (bathroom, kitchen, dryer)	Medium Impact, Med-Hi Cost	
Replace carpet with smooth flooring in wet areas (bath, kitchen); meet Enterprise Green Criteria standards	Medium Impact, Medium Cost	
Steam leaks elimination- change radiator valve.	Medium Impact, Med-Hi Cost	
Bath: Minimize moisture hold materials (tub surround, particle board vanity)	Medium Impact, Variable cost	NYC LL13 (2014) - Requires the use of mold-resistant materials in moisture-prone locations: https://www1.nyc.gov/assets/buildings/local_laws/ll13of2014.pdf
Pest proof exterior doorways. Install door sweeps and pest resistant door brushes to all exterior doors and waste storage areas. Ensure entryway thresholds	High-impact, Low Cost	NYC DOHMH IPM Toolkit, Pest Prevention By Design Guidelines
Prevent pest access from sub-areas into living areas through exclusion and the use of pest resistant materials	High Impact, Low Cost	
Seal all joint penetrations with low VOC caulk.	High Impact, Low cost	
Pest proof units and common areas using guidelines presented in the NYC DOHMH IPM Toolkit “Pest Proofing Tips for Owners and Staff”	High impact, medium cost	
Properly install all unit fixtures, including kitchen cabinetry, radiators, sinks, and flooring to prevent pest access and harborage into and through units. Provide	High Impact, Low cost	
Seal utility lines entering apartments to prevent pest access into and through units	High Impact, Low cost	
Ensure building has enough storage capacity for waste generated by the building and the means to clean waste storage areas. Renovate waste storage areas to improve capacity and improve waste storage sanitation.	High Impact, Medium-Hi Cost	
Use durable pest resistant materials for all renovation work.	High Impact, Medium Cost	
Hire lead-paint professional to abate or implement lead hazard control measures. For NYC, see Local Law 1 (2004) for building owner requirements.	High Impact, Med-Hi Cost	http://www1.nyc.gov/site/hpd/owners/Lead-Based-Paint.page
Hire asbestos specialists to inspect, test and remove any asbestos in non intact condition or that may be disrupted during other rehab work.	Medium Impact, High Cost	http://www.nyc.gov/html/fdny/pdf/cda/atru_guidance_document_final.pdf
Repair /install carbon monoxide alarms	High Impact, Low Cost per Unit	http://www1.nyc.gov/site/hpd/owners/Smoke-carbon-monoxide-detectors.page
Stairways: improve lighting, access, appeal, safety	Medium Impact, Low Cost	NYC Active Design Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/environmental/active-design-
Create added indoor and exterior play areas, exterior gardens	Medium Impact, Med-Hi Cost	
Improve daylighting	Low impact, Variable Cost	
Add vegetation to landscaping plans	Low impact, low cost	
Provide secure, ground-floor parking areas for bicycles	Low impact, low cost	
Install dual stairway handrails; slip resistant stairs	High impact, medium cost	
Repair faulty wiring	High impact, medium cost	
Incorporate age-friendly elements in ground floor units, i.e. accessible walk-in showers with no threshold or compressible rubber threshold; wider doorways;	High impact, high cost	NYC Aging in Place Guide for Building Owners -
Ensure light switches are located close to room entrances and outlets are placed at accessible height; occupancy sensor bath light	Medium impact, low cost	
Install reinforcements for potential future grab bar installation in bathroom walls. Grab bars must be securely anchored to wall studs or masonry.	Medium impact, medium cost	
Temperature-controlled water faucets	Low impact, low cost	

EXECUTIVE SUMMARY CONTINUED

Scope (major elements per ASTM E2018)	Condition *				Notes
	Poor	Average	Good	Not Applicable	
Site (except lighting)		X			
Structural Frame and Building Envelope (except windows and insulation)		X			
Windows and Insulation			X		
Roofing (except insulation)			X		
Plumbing (except domestic hot water)		X			Waste Risers
Domestic Hot Water		X			
Heating		X			
Air Conditioning			X		Management Office
Ventilation		X			
Electrical (except lighting)		X			
Lighting (including controls and site lighting)			X		
Vertical Transportation	X				
Life Safety / Fire Protection		X			
Interior Elements		X			

***Good condition**—in working condition and does not require immediate or short term repairs; **Average condition**—in working condition, but may require immediate or short term repairs; **Poor condition**—not in working condition or requires immediate or short term repairs.

MAINTENANCE OVERVIEW

Provide an overview of the maintenance of the property, including existing staff and maintenance and/or janitorial contracts. Document existing practices, products, and outcomes, including the type of products used, and pest management strategies.

Maintenance and/or janitorial contracts:

The building has a maintenance personal capable of doing emergency and general daily repairs as needed. The Super maintains the building. In addition to that, outside certified contractor provide necessary needed repairs and annual maintenance for the heating plant, elevators, and on site lighting.

Maintenance issues:

The super was interviewed and general daily maintenance issues are fully handeld by the building super. Major repairs are addressed by outside contractors. No issues were reported or observed during the walk-through.

ACCESSIBILITY

Outline the existing ADA accessibility and identify any outstanding accessibility issues.

Existing accessibility:

The site is equipped with a ADA compliant elevator.

VIOLATIONS

Provide a summary of any open violations.

Open violations:

The building has Five (5) open DOB violation and one (1) ECB Violations. Majortiy of the violations are related to the Elevators.

FEMA COMPLIANCE

Provide a summary of any building characteristics that place the building out of compliance with the FEMA National Flood Insurance Program

Compliance Issues:

The building is on the FEMA Flood Map Flood Area for high Risk

APPENDIX G COMPLAINCE

Provide a summary of any building characteristics that place the building out of compliance with the Appendix G of New York City Building Code for Substantial Improvement of buildings in Special Flood Hazard Areas

Compliance Issues:

The purpose of this appendix is to promote the public health, safety and general welfare and to minimize public and private losses due to flood conditions in specific flood hazard areas through the establishment of comprehensive regulations for management of flood hazard areas. This building is not located in a flood zone and therefore is in complinace with Appendix G of the NYC Building Code.

IMPLEMENTATION

Many resources are available to assist developers in proceeding to implement recommendations in this Integrated Physical Needs Assessment, to upgrade our low and moderate income housing stock, to reduce energy and water use, and improve health and safety in them.

• **Housing finance agencies** provide guidance and oversight for renovation projects and can provide access to financial resources such as tax credits.

• **Financing** can be provided through organizations that specialize in low and moderate income housing, such as CPC and NYCEEC, as well as by traditional banks.

• In New York City, the **NYC Retrofit Accelerator** offers free, personalized advisory services that streamline the process of making energy efficiency improvements to your building that will reduce operating costs, enhance tenant comfort, and improve our environment.

• Across New York State, **NYSERDA** provides a variety of services and support for energy projects. Electric and gas utilities are also under mandate to support energy projects with a variety of incentives.

BUILDING INFORMATION

Project Info

If this project includes multiple buildings, **please describe how the multiple buildings are being accounted for within this IPNA tool. Describe what information is aggregated and what information is building specific.** Please note, a separate IPNA tool should be used for each building type and for each scope of work. Multiple buildings may be grouped in a single IPNA tool if they are of the same building type with the same scope of work.

5 residentail towers and 1 commerical center that inlcudes the heating plant.

Project Name	Luna Park Housing Corp.
Address (enter primary address)	2879 West 12th Street
City	Brooklyn
Zip Code	11224
Number of Above-Ground Floors (for multi-building projects, enter the height of the tallest building)	20
Building Gross Area (SF) (aggregate for all buildings included in this tool)	2,449,300
Project owner type? (rental or coop/condo)	Co-op/Condo
Non-profit owner?	Yes
Landmarked Building(s)?	No
Is project in a historic district?	No
Is the project in a flood zone?	Yes

INSPECTION - PHYSICAL NEEDS

Site Inspection	Material	Condition	Site Inspection Narrative / Recommendations
Sidewalk	Concrete	Fair	Few uplifted concrete flags at the sidewalk should be replaced and the dropped granit curbs should be reset.
Curbs	Granite	Good	
Yard / Courtyard Concrete	Concrete	Fair	
Area / Yard Drains	Cast Iron	Good	
Ramps	N/A	N/A	
Stoop and Stairs	Concrete	Fair	
Areaway / Sidewalk Grates	Metal	Fair	
Fire Passages	N/A	N/A	
Wrought Iron Fence/Gates	N/A	N/A	
Chain Link Fences	Metal	Fair	
Debris	N/A	N/A	
Exterior Stairs	Concrete	Fair	
Trash Enclosures	N/A	N/A	
Landscaping / Vegetation	Urban Land	Fair	
Open Space / Playground	Playground / Seating Area	Fair	

Structure Inspection	Material	Condition	Structure Inspection Narrative / Recommendations
Foundation	Concrete	Fair	The overall structure of the building is in good condition, with the exception of the covered walkway edges which need to be repaired. L&M inspected the cellars of each building, #1-5. Overall the concrete structures inside the cellar crawlspaces appeared to be in fair condition. Several locations of underside repairs and minimal concrete column repairs were noted. Slight undermining of the foundation wall was observed, however the wall is supported on the column footings and this is not a structural issue. Most of the deterioration noted in the cellars were located on/near the cellar entrance ramps and the concrete beams above the cellar crawlspaces. There were several locations where the corroded reinforcement was visible and the concrete had previously spalled off.
Typical Floor	Concrete Plank	Fair	
Roof Deck	Concrete Plank	Fair	

Roof Inspection	Material	Condition	Roof Inspection Narrative / Recommendations
Exterior Walls	Masonry	Fair	The complex has 5 residential towers and one commerical/service building. All the roofs have been repalced with new cold liquid applied roofing and insulation, and are underwarranty. The 5 buildings are high and has high solar accessibility. each roof has up to 2,150 SqFt of space that can be utilized for solar system on each building.
Type	Brick with Cast Stone	Fair	
Membrane	Tar	Fair	
Entry Floor	Brick with Cast Stone	Fair	
Insulation	Assumed	Fair	
Coatings	N/A	N/A	
Flashings / Pitch Pockets	Not Visible	Fair	
Chimney	Brick Masonry	Fair	
Parapets	Brick	Fair	
Roof Railings	Metal	Fair	
Dumbwaiter/Shafts	N/A	N/A	
Bulkhead(s)	Brick Masonry	Fair	
Vents	Metal	Fair	
Roof Drainage	Cast Iron	Poor	
Bulkhead Drainage	Cast Iron	Fair	
Water Storage	Water Tank	Fair	
Mechanical Systems on Roof	EMR Fans Wirless	Fair	

Exterior Structure Inspection	Quantity	Condition	Exterior Structure Inspection Narrative / Recommendations
Fire Escape	N/A	N/A	N/A
Metal Stairs	N/A	N/A	
Overhang	N/A	N/A	

Exterior Doors Inspection	Quantity	Condition	Exterior Doors Inspection Narrative / Recommendations
Main Entrance	5	Good	Entrance and vestibule doors are aluminum and glass doors with automatic mechanism Bulkhead doors are painted steel doors and frames with exit hardware at the stair doors.
Vestibule	5	Good	
Basement / Cellar	10	Fair	
Bulkhead	10	Fair	
Other			

Interior Common Area

Common Areas	Condition	Common Areas Inspection Narrative / Recommendations
Vestibule	Tile, glazed CMU	The entry consists of an entry door with sidelight and transom into the vestibule and a vestibule door into the main hall. These doors are in satisfactory condition.
Lobby	Tile, glazed CMU	
Stairs	Concrete	
Typical Floor	Concrete	
Doors	Steel	
Landing	Concrete

Apartments				
Apartments Inspected	Unit	Unit Size	Occupied (Y/N)	Apartments Inspection Narrative / Recommendations
Apartment 1	Appendix A	Appendix A	Appendix A	Due to the large size of units. Please refer to Appendix A for all units' related infomration. The unit visited are moderatly upgraded and are being renovated as needed and when the unit is vacant. All units have GE circuit breaker panels that is in fair condition. The lighting fixtures in the bathrooms, kitchens, and other rooms were recently upgraded with LED bulbs. Some still contain CFL bulbs. Majority of the apartments have original switches and outlets. Lighitg fixtures, switches, and outlets are in fair condition. Majority of the outlets in the bathrooms and kitchens are not GFI outlets. Finally, it was noted that all of the apartments have combination CO/Smoke Detectors that are battery powered.

Plumbing	Description	Condition	Plumbing Inspection Narrative / Recommendations
Water Services	Two 8" Steel Piping w/ Meter	Good	Domestic Water to the buildings is provided thru two (2) water services (8" each) at building #3. Water services piping is black steel. Both services combine and is connected to the building house pumps that pump the water to the roof tanks. There are two relatively new roof tanks (20,000 gallons each, installed in 2014) that serve both domestic water for plumbing fixtures and standpipes. The water is downfed then branches to feed each building. A control shutoff valve is installed at each water piping entering a building. valves appear to be original. Water supply piping branches at each building to feed hot water storage tanks with steam coils. Then, the domestic hot and cold water is upfed to the apartment plumbing fixtures. The sanitary and storm water cast iron piping and drains where visible, appeared to be in fair condition. We do not anticipate any major replacement or repair being required to this system within the next five (5) years. Each building is equipped with separate waste house trap. Regular cleaning of storm and waste lines is recommended. There are a duplex sump pumps in a pit in the cellar of each building. These pumps are used to pump waste/drain water to the main waste piping.
Sanitary Waste	5-4" Cast Iron	Poor	
Storm Waste	Combined with Sanitary	N/A	
Sump Pumps	Duplex Sump Pump	Good	
House Trap(s)	Two (2) Trap Below Ground/Building	Fair	
Water/Waste Leaks	Minor to Low	Fair	

Electrical	Description	Electrical Inspection Narrative / Recommendations
Point of Service	West 12th Street	The description below is for each building: The building is master metered by Con Edison receiving power under the SC-8. The service splits into a 4000A service switch which feeds the apartment general loads, PL&P, and site lighting. In 2000, four new 1200A service switches were added to provide air conditioning for the apartments. The 4000A service feeds one (1) 4000 Amp original 1960 knife blade, exposed bus, switch and fuse distrubtion panel. The main DP then splits to feed multiple modern (2012) apartment switch and fuse QMQB distrubtion panels to feed each wing and line of apartmets. The PL&P loads are fed from a an original knife blade distrubtion panel. The AC service switches feed multiple new QMQB distribution panels to feed AC outlets for each apartment line. The building first floor and cellar also contain multiple circuit breaker panels that were found to be new from the 2012 renovation. The distribution panels and lighting panels located in each of the five (5) elevator machine rooms are all original. All original distribution panels, service switches, and lighting panels have been inspected using infrared cameras to detec heat spots. Any detected heat spot was repaird. The building has limited number of emergency fixtures with Exit signs in the lobby and cellar exit. it is highly recommended to add emergency fixtures on the hallways and stairwells to protect tenants during power outage.
Meter Bank Location	1st Floor Electrical Room / Building	
Service Size	8800 Amps / Building	
Main Fuse Disconnect	4000 Amps Service Switch / 3000 Amps Fuse For PL&P Power and Residential and Four (4) 1200 Amps Service Switches for AC / Building	
Distribution Panel	Multiple Distribution panels located throughout the first floor and cellar	
Emergency Lighting	Emergency fixtures on Exit Lights - Fair condition.	
Wiring	Copper	
Intercom	Wired intercom system in fair condition.	
Other Elec. Util.	CHP Units Serving Each Building	

Elevator	Description/Location	Condition	Elevator Inspection Narrative / Recommendations
Quantity	3 Per Building - 15 Total	Good	Each of the five (5) residential buildings is equipped with three (3) passenger 25 horsepower DC motor elevators with AC generators manufactured by Imperial. The elevators are controlled by a control panel of the same vintage with digital drive. The elevators are original but was re-built multiiple times. The elevators are well maintained by the building staff and an outside maintenance company. the Commercial/Service building does not have elevators.
Manufacturer	Imperial	Good	
Cab	Stanless Steel	Good	
Cab Door	Stanless Steel	Good	
Hall Door	Stanless Steel	Good	
Interlocks	N/A	N/A

Fire Protection	Description/Location	Condition	Fire Protection Inspection Narrative / Recommendations
Sprinkler	standpipes system through out the buildings	N/A	The roof mounted water storage tanks (at the roof of building #3) provide fire reserve water for the standpipe system at each building. A downfeed riser from the roof tank supplies the fire standpipes hoses located in the stairwell of each building on each floor. A Siamese connections located at the exterior wall of the building provides for additional firefighting capability by the fire department. There is a sprinkler system that serves the laundry areas and compactor rooms, which is tied into the domestic system. Buildings 3 and 4 do not have sprinkler system in the laundry rooms. The fire standpipes and sprinkler systems are original and appear to be in fair condition.
Fire Alarm	Local Units Only	Fair	
Smoke / CO Detectors	Local Units Only	Fair	
Equipment	N/A	N/A	
Other	Fire Standpipe System	Fair	
Interlocks			

Compactor	Description	Condition	Compactor Inspection Narrative / Recommendations
Compactor	2 Unit no Nameplate/building	Poor	Each of the five (5) residential buildings is equipped with two (2) compactor system. The compactors are located in the cellar level below the refuse chute which is located in the center of the residential hallways. The compactor machines, chute, and associated sprinkler and controls are in fair condition. the hooper doors on each floors are in poor condition. The Commercial/Service building does not have a compactor.
Chute	No Nameplate	Poor	
Hopper Doors	No Nameplate	Poor	
Sprinkler	Yes	Fair

Additional Information

Environmental Narrative

Describe whether any of the following exist at the building: asbestos containing materials, petroleum storage, lead paint, etc.

Asbestos in the boiler room and on other mechanical equipment has been removed during the heating system upgrade. The asbestos in the roof, facade, and windows was abadted as part of the renovation project between 2010-2015. The building operator confirmed that some of the 9x9 tiles in the hallways and apartments are still containing asbestos. Those should be abadted or sealed as needed. No lead paint was reported.

Accessibility Issues (Section 504 Compliant, etc.)

Describe whether the building meets all the requirements for persons with disabilities, based on the laws in effect at the time the building was constructed and subsequent renovations.

Each building has elevators that are ADA compliant.

Historic Preservation Issues

Describe any special requirements related to Historic Preservation if a Federal, State, and/or City listed site.

N/A

Flood Risk

Identify the Flood Zone as shown on Flood Insurance Rate Map (FIRM) for New York City and the Base Flood Elevation (if listed) for both the Effective FIRM and Preliminary FIRM.

The building is located in a flood zone and should concider a resaliancy project for the electrical and boiler rooms.

Future Flood Risk

Use the DCP Flood Hazard Mapper to determine if the property will experience tidal flooding based in 2100 based on high estimates and the site's Flood Zone in 2100.

The buildings are located one block of the beach in Coney Island. They are in flood hazard zone "AE".

INSPECTION - ENERGY AND WATER

Building Envelope

General Building/Envelope Description	The primary facades are comprised of concrete blocks surrounding the building. From visual inspection, the building walls consist of 4-6" face bricks, 4" low-weight concrete blocks, and gypsum boards inside the apartments with an average U-value of 0.28.

ENERGY AND WATER USE

Project Info

Is this project benchmarking energy and water usage in EPA Portfolio Manager?	**Yes**

Summary of Metering

APARTMENT USE	Metering Type*	Paid By	Notes
Electricity	Master Metered	Owner	
Gas	Master Metered	Owner	
Water	Master Metered	Owner	

***Direct Metered:** meter for each unit provided by the utility; **Submetered**: meter for each unit provided by the building; **Master Metered**: no unit meters, tenants charged indirectly through rent or other common charges.

OWNER-PAID COMMON AREA ELECTRICITY TARIFF: (only needed for buildings with ConEd electricity)	**EL8**

Summary of Utility Data Analysis

Note:

- If your building is located in NYC and you have benchmarking data that has been submitted to the city for compliance, please use that data.
- These amounts should NOT be normalized for weather- it should be the raw energy data, for example as received from the utility.
- If "Other" is used, populate conversion factors and fill fuel type at bottom of this tab

	Existing Annual Energy Use and Cost									Projected Annual Energy Use and Cost									
(All values are total annual values)	Electricity (kwh/yr)	Natural Gas (therms/yr)	Oil #2 (gal/yr)	Oil #4 (gal/yr)	Oil #6 (gal/yr)	District Stream (Mlbs/ yr)	Water (gal/yr)	Other (note units)	Total Site Energy Use (kBtu/yr)	Electricity (kwh/yr)	Natural Gas (therms/yr)	Oil #2 (gal/yr)	Oil #4 (gal/yr)	Oil #6 (gal/yr)	District Stream (Mlbs/ yr)	Water (gal/yr)	Other (note units)	Total Site Energy Use (kBtu/yr)	% Reduction

Summary of Utility Analysis

Year reported above:	2022		
Site Energy Use Index	50.3	*kBtu/SF/year*	
Source Energy Use Index	63.3	*kBtu/SF/year*	
Heating Index	11.16364169	*Btu/SF/HDD*	Note: The Heating Index should include one year of heating consumption.
Total HDD in Benchmarked Year	5667	*HDD*	
Energy Cost Index	$1.08	*$/SF/year*	
Water Consumption Index	31,886	*Gal/Bedroom/Day*	
Existing GHG Intensity Index	0.00431	*tCO_2e/SF*	Note: GHG calculations are based on conversion factors and sources below.
Projected GHG Intensity Index	0.00391	*tCO_2e/SF*	Note: GHG calculations are based on conversion factors and sources below.

Blended Utility Rates		
Electricity Rate	$ 0.20	**per kWh**
Natural Gas Rate	1.55	**per Therm**
Oil #2 Rate	0	**per Gal**
Oil #4 Rate	0	**per Gal**
Oil #6 Rate	0	**per Gal**
District Steam Rate	0	**per MLb**
Water Rate	0.00556	**per Gal**

Estimated End Use Breakdown of Energy Consumption

Enter the estimated percent of electricity and/or fossil fuel that is used for each of the following end uses:

Electricity		
Space Heating	5	%
Cooling	35	%
Lighting	16	%
Other	44	%
Total	100	%
Fuel		
Space Heating	62	%
Hot Water / Baseload	38	%
Total	100	%

Department of Housing Preservation & Development

SOLAR FEASIBILITY ANALYSIS RESULTS

Version 1.9, Updated May 2022

SOLARone

PRELIMINARY SOLAR FINANCIAL ANALYSIS: Luna Park Housing

Solar electric systems provide electricity bill savings, however they are also eligible for a number of federal, state and local incentives that can significantly improve return on investment. The summary below includes estimated costs, incentives, electricity bill savings, and payback period for a solar energy system on this property.

Solar Energy System Size (kW-DC)		**700.00**
Year One Solar Production (kWh)		**805,000**
Year One Utility Bill Savings	**$**	**76,554**
Total Cost ($/Watt-DC)	$	4.05
Total Cost Estimate	$	2,836,500
NY-SUN Incentive	$	900,000
Upfront Cost Estimate	**$**	**1,936,500**
Cost After Incentives and Taxes	**$**	**434,794**
Payback Period		**6 years**
Internal Rate of Return		**11%**
Lifetime Net Savings	**$**	**1,457,659**
Federal Investment Tax Credit*	$	425,987
Low Income Housing Tax Credit	$	-
NYC Property Tax Abatement	$	387,300
Residential State Income Tax Credits	$	-
Depreciation (Federal and State)*	$	688,419
Federal Taxes Due on State Tax Credit	$	-

**If building owner is not able to benefit from tax incentives directly, third-party ownership may allow the owner to benefit from tax incentives indirectly.*

FEASIBILITY REPORT SUBMITTED BY	
Name	*Faisal Taha*
Company	*Lawless & Mangione Architec*
Email	*Faisalt@lawlessmangione.cor*
HPD ID	*12345*

WARNING: incomplete form. Please enter values for all blue fields on the Project Info, Building Info, and Solar Layout tabs.

NEXT STEPS
1. Submit Solar Feasibility Analysis to HPD.
2. HPD approves project, exempts project, or requires a Solar Consultation.
3. Refine solar design as needed.
4. Solicit bids from NYSERDA-qualified solar installation companies.

Instructions / Definitions / Notes

1. **Local Law 97* requires owners of most buildings > 25,000 SF in NYC to deeply reduce their carbon emissions.** The law is made up of two sections: Article 320 which establishes emissions limits for buildings starting in 2024 (although the deadline is delayed for certain affordable housing), and Article 321, which establishes an alternative compliance pathway for some affordable housing. Because many affordable housing projects are subject to Article 321 compliance deadlines in 2024, it is imperative that IPNA scopes enable buildings to comply. For projects subject to other deadlines, the IPNA can help buildings design for future compliance.
2. **Completion of this tab is required for all projects in NYC subject to Local Law 97*. All other projects may skip this tab.** Completion of this tab is mandatory, and must align with the scopes outlined in the IPNA. It is recommended that projects with buildings with upcoming LL87 reporting deadlines implement scopes that incorporate all measures so as to be in compliance with LL97 and LL87 simultaneously - to the extent allowed by DOB. This tab will be used to inform building scopes and ensure that the proper steps are taken for compliance. It will be the owner's responsibility to produce the mandatory reports to prove compliance. As of November 2021, LL97 rulemaking has not been finalized. Provider should use the most up-to-date LL97 guidance released by the DOB: see links at bottom of page.
3. Fill in Table 1 for every building in the project > 25,000 sf and/or subject to Local Law 97, noting which section of the law is applicable. See link at bottom of page for HPD's"Fact Sheet for LL97 and Affordable Housing"
4. Fill in Table 2 for every building in the project proposing to meet LL97 Compliance by implementing the applicable Prescriptive Energy Conservation Measures (as outlined in Article 321). The scope outlined in this table must align with the scope outlined in the rest of the IPNA, including Scope and Prelim, O&M, and Replacement Cost Schedule tabs as appropriate.
5. Fill in Table 3 for every building in the project proposing to meet LL97 compliance by meeting the appropriate emissions limits outlined in LL97 (buildings subject to Article 321 must meet 2030 limits in 2024, buildings subject to Article 320.3.9. will meet 2035 limits starting in 2035). The scope outlined in this table must align with the scope outlined in the rest of the IPNA, including Scope and Prelim, O&M, and Replacement Cost Schedule tabs as appropriate.

* ***If you have any questions about Local Law 97, including Articles 320 or 321, or would like guidance on Local Law 97 for Affordable Housing, please see the links at the bottom of the page.***

OPERATION AND MAINTENANCE MEASURES

General Recommended O&M Interventions	Intervention Type	Why Do It	Frequency	Impact / Cost	Notes
Repair leaks immediately. Any leaking faucet or valve must be repaired immediately. This will not only save water but also reduce hot water consumption, preventing water damage to surrounding areas.	Water Conservation	Conserve Water	Daily	Energy Saving	N/A
Repair all air vents/steam traps to ensure a higher efficiency of the heating system in the building.	Heating and Cooling	Balance Heating System	Daily	Energy Saving	N/A
Encourage the use of low-flow showerheads and faucet aerators. Low-flow fixtures not only reduces water consumption, but also reduces energy required to generate domestic hot water.	Water Conservation	Conserve Water	Annually	Energy Saving	N/A
Encourage the use of low-flow toilets (1.6 gallons per flush). Low-flow toilets use more than 50% less water per flush than standard toilets (3.5 gallons per flush).	Water Conservation	Conserve Water	Annually	Energy Saving	N/A
Ensure that any repairs made to steam and DWH water piping is reinsulated.	Heating and Cooling	Reduce Fuel Usage	Daily	Energy Saving	N/A
Check Fans operation on daily basis	Existing Maintenance	Assure Proper Ventilation	Daily	Energy Saving	N/A
Check DHW Temperature after the mixing valve on daily basis	Heating and Cooling	Conserve Energy	Daily	Energy Saving	N/A
Record water consumption by the Boiler Feed Unit "Fresh Water"	Heating and Cooling	Conserve Energy	Daily	Energy Saving	N/A
Check Condensate Return Temperature	Heating and Cooling	Conserve Energy	Daily	Energy Saving	N/A
Check Common Area Lighting During Operating Hours	Lighting	Conserve Energy	Daily	Energy Saving	N/A
Check Common Area Window Type AC units	Heating and Cooling	Conserve Energy	Daily	Energy Saving	N/A
Check and Clean Master Traps	Heating and Cooling	Conserve Energy	Annually	Energy Saving	N/A
Check operation of exterior lighitng fixtures	Lighting	Conserve Energy	Weekly	Energy Saving	N/A
Walk the grounds to check for uplifted flags	Other	Safety	Daily	Energy Saving	N/A
Conduct Check on all windows	Heating and Cooling	Conserve Energy	Annually	Energy Saving	N/A
Check Roof using a thermal camera	Heating and Cooling	Conserve Energy	Annually	Energy Saving	N/A

Health Related O&M Interventions to Evaluate	Intervention Type	Applies to This Building (Y/N)	Why Do It	Frequency	Impact / Cost	Relevant NYC Code and Resources	Enterprise Green Communities Criteria
Inspect fans, fix and clean vents/ventilation ducts, replace filters. Set regular inspection schedule.	Health - Air Quality and Ventilation	Yes	Asthma & respiratory risks	Annual, Filters every 6 mos.	High impact, low cost	§[C26-1205.1] 27-745 Occupiable rooms. All occupiable rooms shall be ventilated by natural or mechanical means, or by a combination of both. Natural ventilation may be provided except where mechanical ventilation is required by article seven or eight of this subchapter.	5.1a Building Performance Standard 5.3 Sizing of Heating and Cooling Equipment 6.10 Asthmagen-Free Materials 7.1 Ventilation 7.2 Clothes dryer exhaust 7.3 Combustion Equipment
Educate tenants about ways to improve ventilation and about reporting fans that don't work and windows that don't open.	Health - Air Quality and Ventilation	Yes	Asthma & respiratory risks	Lease up & annual	High Impact, low cost		
Educate tenants about identifying and reporting problems with central heating/cooling.	Health - Air Quality and Ventilation	Yes	General health; energy efficiency	Lease up & annual	High Impact, Low cost		
Ensure regular cleaning of dryers to improve functionality and to reduce fire hazards.	Health - Air Quality and Ventilation	Yes	Respiratory risks & fire hazards	Annual	High Impact, low cost		
Ensure proper venting of dryers.	Health - Air Quality and Ventilation	Yes	Respiratory risks & moisture control	Annual	Medium Impact, High Cost		
Evaluate boiler to ensure proper combustion safety to ensure proper combustion safety and to efficiently manage temperature.	Health - Air Quality and Ventilation	Yes			Low Impact, Low cost		

Prohibit smoking within units and within 20ft of building. Incorporate no smoking provisions in lease. Note	Health - Air Quality and Ventilation	Yes	Asthma and cancer risks	One time change	High Impact, Low Cost	https://www1.nyc.gov/site/doh/health/health-topics/smoking-smoke-free-housing.page	
Clean mold, eliminate water leaks, clean surfaces and replace surfaces as needed. Fix drainage as needed.	Health - Moisture	Yes	Asthma & respiratory risks; moisture control	As needed	High impact, low cost	http://www1.nyc.gov/site/doh/health/health-topics/air-quality-indoor-moisture.page	4.3 Leaks and Water Metering 6.7a,b Environmentally Preferable Flooring: 6.8 Mold Prevention: Surfaces 6.9 Mold Prevention: Tub and Shower Enclosures 7.5 Vapor Retarder Strategies 7.7 Mold Prevention: Water Heaters
Educate tenants about importance of and ways to report leaks (running toilets, leaking radiators, dripping faucets, moisture problems, and mold issues in the building.	Health - Moisture	Yes	Asthma & respiratory risks; moisture control	Lease up & annual	High Impact, Low cost		
Replace or place entry door weather-stripping and door sweeps.	Health - Moisture	Yes	Moisture control; energy efficiency		Medium Impact, Low Cost		
Seal holes and cracks, including around plumbing and utility openings and foundation. Install door sweeps to prevent pest entry. Use pest resistant materials during repairs. Accompany pest management professional during each service visit to identify areas in need or repair. Train staff to monitor pest prone places for conditions conducive to pests. Adopt the use of reduced risk pesticides building wide. Review pest proofing tips for building owners, managers and staff in NYC DOHMH IPM Toolkit.	Health - Pests	Yes	Asthma risks, pest control	Rehab, unit turnover, annual inspections	High impact, low cost	NYC Integrated Pest Management Tool Kit http://www.nyc.gov/html/doh/downloads/pdf/pesticide/ipm-toolkit.pdf	7.10 Integrated Pest Management
Educate residents on how to minimize food and water sources for pests; identify and report openings for repair; on the use of reduced risk pesticides (gel bait, bait stations). Educate management on implementation of a building-wide Integrated Pest Management (IPM) protocol.	Health - Pests	Yes	Asthma risks, pest control	Lease up & annual	High Impact, Low Cost		
Adopt an integrated pest management scope of work	Health - Pests	Yes	Asthma risks, pest control	Pest contract	High impact, Low Cost	NYCDOHMH Toolkit	

Ensure garbage room is properly maintained through maintenance and ensure waste storage capacity meets the needs of the building	Health - Pests	Yes	Asthma risks, pest control	6 months	Medium Impact, Low Cost		
Institute an off gassing period for units before occupancy after rehabilitation, especially after carpeting, painting, and floor work	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Post rehab	High impact, low cost	NYC Local Law 2 (2012) - VOC Emissions Limits in Carpets and Carpet Cushions: https://www1.nyc.gov/site/doh/health/health-topics/air-quality-vocs-and-carpeting-what-consumers-and-the-public-should-know.page and https://www1.nyc.gov/assets/buildings/local_laws/ll2of2012.pdf Floor Refinishing and Moisture-Cure Urethanes: https://www1.nyc.gov/site/doh/health/health-topics/floor-refinishing.page	3.1 Environmental Remediation 5.4 ENERGY STAR Appliances 6.1 Low / No VOC Paints, Coatings and Primers 6.2 Low / No VOC Adhesives and Sealants 6.6 Composite Woods Products that Emit low/No Formaldehyde 6.7 Environmentally Preferable Flooring 6.10 Asthmagen-Free materials 7.1 Ventilation 7.3 Combustion Equipment 7.8 Radon Mitigation 7.15 Reduce Lead Hazards 7.16 Smoke-Free Building 8.3 Resident Manual 8.4 Resident and Property Staff Orientation
Ensure carbon monoxide (CO) detectors are installed pursuant to code. Mitigate sources of CO build-up, i.e. back drafting, unventilated heaters, or other combustion effects. Educate tenants to report if their CO detector is going off.	Health - Hazardous Materials and Conditions	Yes	CO poisoning risks	Annual inspection; Lease up	Med-Hi Impact, Low Cost	http://www1.nyc.gov/site/hpd/owners/Smoke-carbon-monoxide-detectors.page	
Use green products in cleaning, rehab, repairs, painting. Use low-/no-volatile organic compounds (VOCs), low/no formaldehyde in cleaning products, paint, sealants, adhesives, building materials.	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Ongoing	Medium Impact, Low Cost	http://programs.lisc.org/NYC/Images/Two_Shades_of_Green_-_Green_Cleaning_Toolkit.pdf; Greenseal; Greenshield; EPA Safer Choice; EPA Formaldehyde emissions standards for composite wood products: https://www.epa.gov/formaldehyde/formaldehyde-emission-standards-composite-wood-products	
Seal and clean ventilation ducts, can be HVAC or maintenance staff	Health - Hazardous Materials and Conditions	Yes	Respiratory and other health risks	Rehab, energy projects	Medium Impact, Medium Cost		
Use no-VOC and no-formaldehyde paint, adhesives, sealants, cleaners, and products	Health - Hazardous Materials and Conditions	Yes			Medium Impact, Medium Cost	EPA Formaldehyde emissions standards for composite wood products: https://www.epa.gov/formaldehyde/formaldehyde-emission-standards-composite-wood-products	
Lead: In buildings constructed prior to 1978 (or 1960 in NYC), ensure that lead-safe renovation practices are utilized for any repairs that could disturb lead-based paint. Have building maintenance staff trained and certified in EPA Renovation, Repair and Painting (RRP).	Health - Hazardous Materials and Conditions	Yes	Neurological damage	Rehab, annually for units occupied by young children		In NYC, Local Law 1 of 2004 (the Lead Paint Law) requires owners to annually inspect units occupied by children under the age of six, to identify and fix lead paint hazards.	
Ensure indoor and outdoor areas are well lit	Health - Active Design Opportunities to Encourage Physical Activity	Yes	Encourage physical activity	Rehab, ongoing	Med-hi impact, low cost		3.4 Landscaping 5.5 Lighting 7.12,13 Active Design 7.14 Interior and Outdoor Activity Spaces for

Ensure stairs are attractive option over elevators - located close to the entrance and well-lit (with daylight if possible); stair prompt signage	Health - Active Design Opportunities to Encourage Physical Activity	Yes	Encourage physical activity	Ongoing	Low Impact, High Cost	Stair prompt sign: www1.nyc.gov/assets/doh/downloads/pdf/tcny/takethestairs.pdf or call 311 to order signs in English or Spanish NYC Active Design Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/environmental/active-design-guidelines.pdf Center for Active Design Guidelines: https://centerforactivedesign.org/dl/guidelines.pdf	Children and Adults 8 2.9 Improving Connectivity to the Community 8.1 Building Operations & Maintenance (O&M) Manual and Plan
Install hand held and adjustable shower heads	Health - Fall, Trip, and Fire Hazard	Yes	Reduce trip and fall risks	Annual inspection	Medium impact, Low cost		5.5 Lighting 7.11a,b Beyond ADA: Universal Design 7.12, 13 Active Design 8.1 Building Operations & Maintenance (O&M) Manual and Plan
Install slip-resistant adhesive in dark or contrasting color at the edge of each stair	Health - Fall, Trip, and Fire Hazard	Yes	Reduce trip and fall risks	Annual inspection	Medium Impact, Low Cost		

	A	B	C	D	E
5	**HEALTHY REHAB INTERVENTIONS**				
6	Intervention- Rehab	Applies to This Building (Y/N)	Impact / Potential Cost	Relevant NYC Code and Resources	Enterprise Green Communities Criteria
7	**Air Contaminants or Allergens From Indoor Sources**				
8	Vent gas combustion appliances (boilers, hot water heater, stove top)	Yes	High Impact, Variable Cost		6.1 & 6.2 Low / No VOC Adhesives and Sealants
9	Remove carpet; make floors smooth and cleanable	Yes	Medium Impact, Variable cost		6.7 Environmentally Preferable Flooring
10	Replace gas stoves with electric	Yes	Medium Impact, High Cost		6.10 Asthmagen-Free Materials
11	New building materials meet green and health standards (VOC, formaldehyde)	No	Medium Impact, Low Cost	http://living-future.org/redlist	7.1 Ventilation 7.2 Clothes dryer exhaust
12	Repair/replace roof top fans, and seal duct work	Yes	Medium Impact, Med-Hi Cost		7.3 Combustion Equipment
13	Install constant airflow regulators w/ continuous exhausts	No	Medium Impact, Variable cost	Cost decreases with scale	7.7 Mold Prevention: Water Heaters
14	**Air Contaminants or Allergens From Outdoor Sources**				
15	Install enhanced air filtration in building ventilation/HVAC	Yes	High impact, medium cost		
16	Locate exterior intake grilles to minimize intake of contaminants	No	Medium Impact, Variable Cost		
17	**Moisture**				
18	Repair leaks, structural issues, water damage, radiator valves, drainage	Yes	High Impact, Variable Cost	NYC Mold Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/epi/epi-mold-guidelines.pdf EPA Mold/Moisture Guide - https://www.epa.gov/sites/production/files/2016-10/documents/moldguide12.pdf	4.3 Leaks and Water Metering 6.7a,b Environmentally Preferable Flooring: 6.8 Mold Prevention: Surfaces 6.9 Mold Prevention: Tub and Shower Enclosures 7.1 Ventilation 7.2 Clothes Dryer Exhaust 7.5 Vapor Retarder Strategies 7.7 Mold Prevention: Water Heaters
19	Repair/install ventilation/fans (bathroom, kitchen, dryer)	Yes	Medium Impact, Med-Hi Cost		
20	Replace carpet with smooth flooring in wet areas (bath, kitchen); meet Enterprise Green Criteria standards	Yes	Medium Impact, Medium Cost		
21	Steam leaks elimination- change radiator valve.	Yes	Medium Impact, Med-Hi Cost		
22	Bath: Minimize moisture hold materials (tub surround, particle board vanity)	Yes	Medium Impact, Variable cost	NYC LL13 (2014) - Requires the use of mold-resistant materials in moisture-prone locations: https://www1.nyc.gov/assets/buildings/local_laws/ll13of2014.pdf	
23	**Pests**				
24	Pest proof exterior doorways. Install door sweeps and pest resistant door brushes to all exterior doors and waste storage areas. Ensure entryway thresholds are sealed properly.	Yes	High-impact, Low Cost	NYC DOHMH IPM Toolkit, Pest Prevention By Design Guidelines	7.10 Integrated Pest Management
25	Prevent pest access from sub-areas into living areas through exclusion and the use of pest resistant materials	Yes	High Impact, Low Cost		
26	Seal all joint penetrations with low VOC caulk.	Yes	High Impact, Low cost		
27	Pest proof units and common areas using guidelines presented in the NYC DOHMH IPM Toolkit "Pest Proofing Tips for Owners and Staff"	Yes	High impact, medium cost		
28	Properly install all unit fixtures, including kitchen cabinetry, radiators, sinks, and flooring to prevent pest access and harborage into and through units. Provide QA on unit interiors to guarantee pest prevention.	Yes	High Impact, Low cost		
29	Seal utility lines entering apartments to prevent pest access into and through units	Yes	High Impact, Low cost		

	A	B	C	D	E
30	Ensure building has enough storage capacity for waste generated by the building and the means to clean waste storage areas. Renovate waste storage areas to improve capacity and improve waste storage sanitation.	Yes	High Impact, Medium-Hi Cost		
31	Use durable pest resistant materials for all renovation work.	Yes	High Impact, Medium Cost		

	A	B	C	D	E
32	**Hazardous Materials**				
33	Hire lead-paint professional to abate or implement lead hazard control measures. For NYC, see Local Law 1 (2004) for building owner requirements.	Yes	High Impact, Med-Hi Cost	http://www1.nyc.gov/site/hpd/owners/Lead-Based-Paint.page	7.15 Reduce Lead Hazards
34	Hire asbestos specialists to inspect, test and remove any asbestos in non intact condition or that may be disrupted during other rehab work.	Yes	Medium Impact, High Cost	http://www.nyc.gov/html/fdny/pdf/cda/atru_guidance_document_final.pdf	
35	Repair /install carbon monoxide alarms	Yes	High Impact, Low Cost per Unit	http://www1.nyc.gov/site/hpd/owners/Smoke-carbon-monoxide-detectors.page	
36	**Active Design to Encourage Physical Activity; Healthy Living**				
37	Stairways: improve lighting, access, appeal, safety	Yes	Medium Impact, Low Cost	NYC Active Design Guidelines - http://www1.nyc.gov/assets/doh/downloads/pdf/environmental/active-design-guidelines.pdf Center for Active Design Guidelines: https://centerforactivedesign.org/dl/guidelines.pdf	3.4 Landscaping 5.5 Lighting 7.12,13 Active Design 7.14 Interior and Outdoor Activity Spaces for Children and Adults 8 2.9 Improving Connectivity to the Community 8.1 Building Operations & Maintenance (O&M) Manual and Plan
38	Create added indoor and exterior play areas, exterior gardens	Yes	Medium Impact, Med-Hi Cost		
39	Improve daylighting	Yes	Low impact, Variable Cost		
40	Add vegetation to landscaping plans	Yes	Low impact, low cost		
41	Provide secure, ground-floor parking areas for bicycles	Yes	Low impact, low cost		
42	**Fall/Trip/Fire Hazard**				
43	Install dual stairway handrails; slip resistant stairs	Yes	High impact, medium cost		5.5 Lighting 7.11a,b Beyond ADA: Universal Design 7.12, 13 Active Design 8.1 Building Operations & Maintenance (O&M) Manual and Plan
44	Repair faulty wiring	Yes	High impact, medium cost		
45	Incorporate age-friendly elements in ground floor units, i.e. accessible walk-in showers with no threshold or compressible rubber threshold; wider doorways; grab bars at tubs, showers and toilets	Yes	High impact, high cost	NYC Aging in Place Guide for Building Owners - http://www.nyc.gov/html/dfta/downloads/pdf/publications/AIPGuide2016.pdf	
46	Ensure light switches are located close to room entrances and outlets are placed at accessible height; occupancy sensor bath light	Yes	Medium impact, low cost		
47	Install reinforcements for potential future grab bar installation in bathroom walls. Grab bars must be securely anchored to wall studs or masonry.	Yes	Medium impact, medium cost		
48	Temperature-controlled water faucets	Yes	Low impact, low cost		

COMPLETENESS CHECK

Quality Control Check Type	Comment
Measure Quantity Check	OK - All measure quantities entered.
Measure Unit Check	OK - All measure units entered.
Measure Lives Check	OK - All measure lives entered.
Baseline Year of Manufacture Check	OK – Baseline years of manufacture entered as required.
Quality Control Check	OK - Responses provided on Quality Control tab.

PROJECT SAVINGS SUMMARY

	OWNER PAID							
	Total Annual Consumption (use/yr)		Total Annual Cost ($/yr)	Total Annual Savings		Total Annual Cost Savings ($)	Total Annual Energy Savings %	Total Energy Cost Savings %
